DETAILED ACTION

Applicant's response, on June 24, 2004 to the action on the merits of this case, mailed March 24, 2004, is acknowledged. It is acknowledged that applicants have cancelled Claims 23, 27, and 61-66, amended Claims 67 and 69, and added Claims 70 and 71. Claims 28, 32-35 and 67-71 are pending and are hereby considered.

Allowable Subject Matter

Claims 28, 32-35 and 67-71 are allowed.

The following is an examiner's statement of reasons for allowance:

All elected Claims, 28, 32-35 and 67-71, are limited to isolated variants of the polypeptide set forth by SEQ ID NO: 2 wherein, at least one histidine residue selected from the group consisting of His36, His105, His110, His139, His152, His225 His234, His241, His424, His469, and His539 has been substituted with a residue selected from the group consisting of alanine, serine, tyrosine, threonine, and lysine. The utility of said polypeptide variants, as having Heparinase III activity, is credible based on expression in heterologous host cells and analysis by an enzymatic assay (Table 2). Furthermore, the unexpected decrease in K_m , upon substitution of His110, His 152, His241, and His424 with alanine, as well as the unexpected increase in K_m , upon substitution of His139 with alanine, makes said substitutions non-obvious to a person of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
